DYNAMIC DESCALER®

World's fastest & safest biodegradable descaler

DYNAMIC DESCALER ® Marine is a safe biodegradable and revolutionary liquid descaler that rapidly dissolves all water scale and lime plus it removes rust and other non-soluble sedimentation deposits safely and effectively (including fouling mediums like calcium, rust, mussels, barnacles, shells..)

- **Fast & Effective Descaler**
- **Biodegradable** - Won't harm the environment
- **Safe** - won't harm workers
- **Economical** - Compare cost to other products and cleaning options
- **Powerful detergents and penetrating agents**
- **Superior corrosion inhibitors**
- **Lowest Corrosion rate** of any descaler

Designed to dissolve the toughest water scale and rust deposits from any marine water-based equipment and piping.

SCALE REMOVAL = LOWER ENERGY COST

Water scale on any heat transfer surface reduces the effectiveness of that heat transfer. This results in reduced equipment efficiency while increasing energy consumption, increasing costs and even increasing plant downtime. In the past removing scale has been a major problem. Mechanical removal requires extensive downtime while the item of equipment is disassembled, then reassembled (Ex.Engine Plate Heat Exchangers). And corrosive acid cleaners, such as concentrated hydrochloric acid, raise occupational health and safety concerns and disposal problems. Not to mention the significant risk of long-term detrimental impact on plant life from metal loss.

Now there is a safe and effective way to remove scale deposits from all types of water-cooled and water-heated equipment.

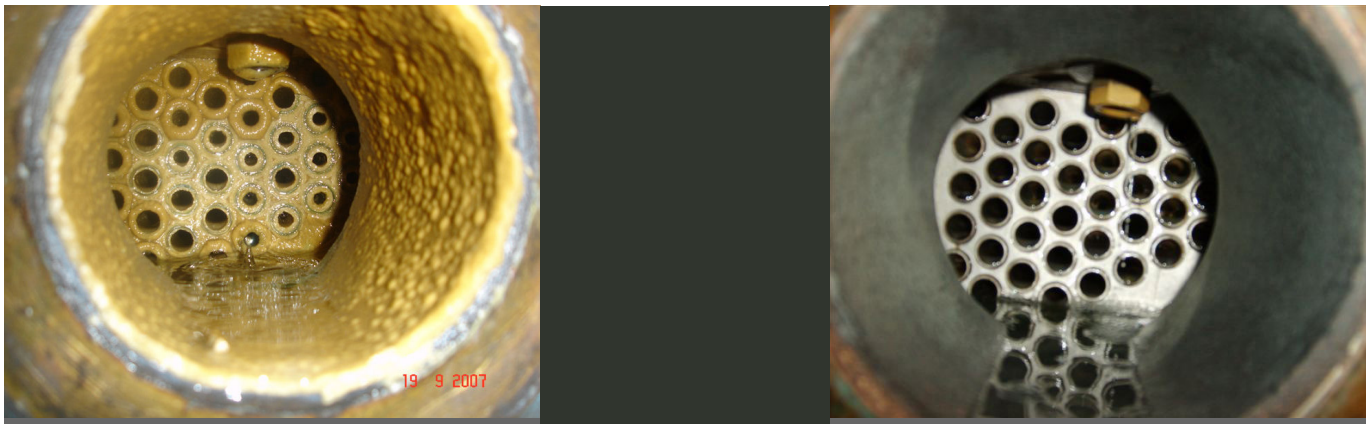

From industrial plants to land mark buildings to marine. Dynamic Descaler is a new technology descaler specifically formulated to rapidly clean mineral scale from passages in water-cooled and heated equipment or simply removing water scale and mussels from marine equipment.

Dynamic Descaler does not corrode, pit, erode or have any other harmful effects on materials and metals such as; STEEL, IRON, BRASS, COPPER, PLASTIC, FIBER, TEFLON or other metals or materials found in water-based systems or equipment.

DYNAMIC DESCALER®

BEFORE AFTER

APPLICATIONS:

- Plate Heat Exchangers
- A/C units
- Boilers
- Marine Heat Exchangers
- Oil coolers
- Bow Thrusters
- Cooling towers
- Water piping systems
- Chillers
- Condensers
- Engine cooling systems
- Sea water intakes
- Pumps-Impellers
- Sea Strainers
- Waste/Vacuum water piping

AQUA SAFE DESCALER®

Aqua Safe Descaler has all the excellent properties of Dynamic Descaler with the additional benefit of being safe on delicate metals such as Titanium, Aluminium, steel, stainless steel, iron, brass, copper, plastic, rubber, and other materials found in most water cooled, heated, or operated equipment. More cost-effective than dismantling your equipment and cleaning manually.

It's ideal for water heat exchangers, hot water heaters, coolers, pumps, boilers, compressors, condensors, extruders, cooling towers, water piping systems and other water side heat exchange surfaces.

Proven 100% safe for use in potable water applications by the NSF (National Sanitation Foundation of the USA). You can safely use Aqua Safe Descaler for marine applications too - it effectively removes water scale and mussels from marine equipment on all types of vessels.

Aqua Safe Descaler is certified in the USA by NSF to NSF/ANSI Standard 60
